Subject index

Acetate solutions
Participation of dinuclear metal complexes in charge transfer at electrodes: The Cu(II)/Cu(Hg) electrode reaction in acetate solutions (Fronaeus) 175

Ac polarography
Ac polarography and ac voltammetry of cystine (Vavřička, Heyrovský) 371

Ac voltammetry
Ac polarography and ac voltammetry of cystine (Vavřička, Heyrovský) 371

Adlayer structure
The adsorption of sulfate on gold(111) in acidic aqueous media: adlayer structural inferences from infrared spectroscopy and scanning tunneling microscopy (Edens et al.) 357

Adsorption
Simple models for adsorption on electrodes. I. Adsorption of monomeric neutral organic molecules (Nikitas) 319
Simple models for adsorption on electrodes. II. Aggregation processes and phase transitions (Nikitas, Andoniou) 339
Adsorption of methanol, 1-propanol and 1-octanol on a mercury electrode and adsorption of 1-octanol on the adsorbed layer of methanol at a mercury electrode (Sawamoto) 391

Adsorption parameters
Reverse pulse polarography of labile metal + macromolecule systems with induced reactant adsorption: theoretical analysis and determination of complexation and adsorption parameters (Galceran et al.) 307

Aggregation processes
Simple models for adsorption on electrodes. II. Aggregation processes and phase transitions (Nikitas, Andoniou) 339

Amperometric enzyme electrode
Amperometric enzyme electrode for Ca^{2+} (Magner, Albery) 123

Aromatic nitro compounds
The reduction mechanism of aromatic nitro compounds in aqueous medium. Part IV. The reduction of *p*-nitrobenzophenone between $H_0 = -5$ and pH 14 (Laviron et al.) 263

Au(111)
The adsorption of sulfate on gold(111) in acidic aqueous media: adlayer structural inferences from infrared spectroscopy and scanning tunneling microscopy (Edens et al.) 357

Au(111) electrode
A voltammetric study of a surface phase transformation of adsorbed HPO_4^{2-} anion on Au(111) in the presence of Na^+ cations (Silva et al.) 395

Benzotriazole
A study of copper electrode behavior in alkaline solutions containing benzotriazole-type inhibitors by the photocurrent response method and intensity modulated photocurrent spectroscopy (Modestov et al.) 293

Biomolecules
Electrochemically controlled release of chemicals from redox-active polymer films (Cosnier et al.) 233

Bipolar membranes
Bipolar membranes under forward and reverse bias conditions. Theory vs. experiment (Ramírez et al.) 101

Bisulphate ions
Underpotential deposition of Cu on Au(111): implications of the HB model (Blum, Huckaby) 69

p-Bromo-nitrobenzene
The photoelectrochemical reduction of *p*-bromo-nitrobenzene: an ECEE, ECE or DISP process? Mechanistic resolution via channel electrode voltammetry (Compton, Dryfe) 247

Calcium
Amperometric enzyme electrode for Ca^{2+} (Magner, Albery) 123

Carbon Dioxide
Electrochemical reduction of carbon dioxide at elevated pressure on semiconductor electrodes in aqueous solution (Halmann, Aurian-Blajeni) 379

Catalytic activity
A novel enzyme electrode for the water-free organic phase (Dong, Guo) 405

Cathode performances
An effect of proton conductivity in electrolyte membranes on cathode performances at polymer electrolyte fuel cells (Watanabe et al.) 415

Cd + Ag alloy
Dynamics of surface alloying promoted by cadmium underpotential deposition–anodic stripping cycles on irregular silver electrodeposits (Martins et al.) 141

Cd(II) polymethacrylate
Reverse pulse polarography of labile metal + macromolecule systems with induced reactant adsorption: theoretical analysis and determination of complexation and adsorption parameters (Galceran et al.) 307

Channel electrode voltammetry
The photoelectrochemical reduction of *p*-bromo-nitrobenzene: an ECEE, ECE or DISP process? Mechanistic resolution via channel electrode voltammetry (Compton, Dryfe) 247

Charge transfer
Participation of dinuclear metal complexes in charge transfer at electrodes: The Cu(II)/Cu(Hg) electrode reaction in acetate solutions (Fronaeus) 175

Contact potential
Dipole effect of (100) monatomic steps of gold $n(111)\times(100)$ vicinal faces in contact with aqueous solutions and under ultra-high vacuum (Lecoeur et al.) 117

Copper
Underpotential deposition of Cu on Au(111): implications of the HB model (Blum, Huckaby) 69

Cu(II)/Cu(Hg) electrode reaction
Participation of dinuclear metal complexes in charge transfer at electrodes: The Cu(II)/Cu(Hg) electrode reaction in acetate solutions (Fronaeus) 175

Cyclic voltammetry
Micrometer size dependence of mass transfer rate across a single droplet|water interface by a laser trapping–electrochemistry technique (Nakatani et al.) 383
A voltammetric study of a surface phase transformation of adsorbed HPO_4^{2-} anion on Au(111) in the presence of Na^+ cations (Silva et al.) 395
L-Cysteine
The electrochemistry of L-cystine and L-cysteine. Part 1: Thermodynamic and kinetic studies (Ralph et al.) 1
The electrochemistry of L-cystine and L-cysteine. Part 2: Electrosynthesis of L-cysteine at solid electrodes (Ralph et al.) 17
Cystine
Ac polarography and ac voltammetry of cystine (Vavřička, Heyrovský) 371
L-Cystine
The electrochemistry of L-cystine and L-cysteine. Part 1: Thermodynamic and kinetic studies (Ralph et al.) 1
The electrochemistry of L-cystine and L-cysteine. Part 2: Electrosynthesis of L-cysteine at solid electrodes (Ralph et al.) 17

Data processing
Straight lines, windows and background current synthesis in deconvolution procedure (Pižeta et al.) 169
Deconvolution procedure
Straight lines, windows and background current synthesis in deconvolution procedure (Pižeta et al.) 169
1-(2,3-dicarboxypropyl)-bezotriazole
A study of copper electrode behavior in alkaline solutions containing benzotriazole-type inhibitors by the photocurrent response method and intensity modulated photocurrent spectroscopy (Modestov et al.) 293
Differential electrochemical mass spectrometry
H/D substitution effect on formaldehyde oxidation rate at a copper anode in alkaline medium studied by differential electrochemical mass spectrometry (Jusys) 257
Differential pulse polarography
Straight lines, windows and background current synthesis in deconvolution procedure (Pižeta et al.) 169
Diffuse double-layer effects
Digital simulations with the fast implicit finite-difference (FIFD) algorithm. Part 4. Simulation of electrical migration and diffuse double-layer effects (Rudolph) 89
Digital simulations
Digital simulations with the fast implicit finite-difference (FIFD) algorithm. Part 4. Simulation of electrical migration and diffuse double-layer effects (Rudolph) 89
Dinuclear metal complexes
Participation of dinuclear metal complexes in charge transfer at electrodes: The Cu(II)/Cu(Hg) electrode reaction in acetate solutions (Fronaeus) 175
Dipole effect
Dipole effect of (100) monatomic steps of gold $n(111)\times(100)$ vicinal faces in contact with aqueous solutions and under ultra-high vacuum (Lecoeur et al.) 117
DISP process
The photoelectrochemical reduction of *p*-bromo-nitrobenzene: an ECEE, ECE or DISP process? Mechanistic resolution via channel electrode voltammetry (Compton, Dryfe) 247
Dopa
Effect of pH on the oxidation pathway of dopamine and dopa (Li, Christensen) 219
Dopamine
Effect of pH on the oxidation pathway of dopamine and dopa (Li, Christensen) 219
Dual-cylinder microelectrodes
Highly sensitive and selective determination of riboflavin by flow injection analysis using parallel dual-cylinder microelectrodes (Peng et al.) 185

ECEE process
The photoelectrochemical reduction of *p*-bromo-nitrobenzene: an ECEE, ECE or DISP process? Mechanistic resolution via channel electrode voltammetry (Compton, Dryfe) 247
ECE process
The photoelectrochemical reduction of *p*-bromo-nitrobenzene: an ECEE, ECE or DISP process? Mechanistic resolution via channel electrode voltammetry (Compton, Dryfe) 247
Electrical migration
Digital simulations with the fast implicit finite-difference (FIFD) algorithm. Part 4. Simulation of electrical migration and diffuse double-layer effects (Rudolph) 89
Electrical properties
Influence of the forming electrolyte on the electrical properties of anodic zirconium oxide films. Part II. Ac impedance investigation (Patrito, Macagno) 203
Electroadsorption
The adsorption of sulfate on gold(111) in acidic aqueous media: adlayer structural inferences from infrared spectroscopy and scanning tunneling microscopy (Edens et al.) 357
Electrochemical–chemical reactions
Theory of EC_1, EC_2, EC_1E, EEC_1 and irreversible surface reactions in polarography (Laviron, Meunier-Prest) 79
Electrochemical impedance spectroscopy
A new approach to measurement modelling in electrochemical impedance spectroscopy (Zoltowski) 45
Influence of the forming electrolyte on the electrical properties of anodic zirconium oxide films. Part II. Ac impedance investigation (Patrito, Macagno) 203
Electrochemical quartz crystal microgravimetry
A combined voltammetry and electrochemical quartz crystal microgravimetry study of the reduction of aqueous Se(IV) at gold (Wei et al.) 109
Electrochemical Reduction
Electrochemical reduction of carbon dioxide at elevated pressure on semiconductor electrodes in aqueous solution (Halmann, Aurian-Blajeni) 379
Electrodeposition
Galvanostatic potential oscillations during the electrodeposition of rhenium (Bakos, Horányi) 387
Electrolysis
Participation of dinuclear metal complexes in charge transfer at electrodes: The Cu(II)/Cu(Hg) electrode reaction in acetate solutions (Fronaeus) 175
Electrolyte effects
Influence of the forming electrolyte on the electrical properties of anodic zirconium oxide films. Part II. Ac impedance investigation (Patrito, Macagno) 203
Electrolyte electroreflectance spectroscopy
The potential distribution across the semiconductor|electrolyte interface: a study by electrolyte electroreflectance spectroscopy of GaAs and $Ga_{1-x}Al_xAs$ under conditions of photodissolution (Hutton et al.) 193
Electrolyte membranes
An effect of proton conductivity in electrolyte membranes on cathode performances at polymer electrolyte fuel cells (Watanabe et al.) 415
Electron-proton transfer
Reorganization of the medium and local vibrations in electrode

reactions of electron–proton transfer (Benderskii, Grebenshchikov) 29
Electropolymerization
Determination of the structure of electropolymerized indole-5-carboxylic acid (Mackintosh et al.) 163
Electroreduction
A combined voltammetry and electrochemical quartz crystal microgravimetry study of the reduction of aqueous Se(IV) at gold (Wei et al.) 109
Electrorelease
Electrochemically controlled release of chemicals from redox-active polymer films (Cosnier et al.) 233
Electrosynthesis
The electrochemistry of L-cystine and L-cysteine. Part 2: Electrosynthesis of L-cysteine at solid electrodes (Ralph et al.) 17
Enzyme electrodes
A novel enzyme electrode for the water-free organic phase (Dong, Guo) 405
Epitaxial films
Dynamics of surface alloying promoted by cadmium underpotential deposition–anodic stripping cycles on irregular silver electrodeposits (Martins et al.) 141
Equivalent circuit models
A new approach to measurement modelling in electrochemical impedance spectroscopy (Zoltowski) 45

Fast implicit finite-difference algorithm
Digital simulations with the fast implicit finite-difference (FIFD) algorithm. Part 4. Simulation of electrical migration and diffuse double-layer effects (Rudolph) 89
Flow injection analysis
Highly sensitive and selective determination of riboflavin by flow injection analysis using parallel dual-cylinder microelectrodes (Peng et al.) 185
Formaldehyde oxidation rate
H/D substitution effect on formaldehyde oxidation rate at a copper anode in alkaline medium studied by differential electrochemical mass spectrometry (Jusys) 257
Forward bias
Bipolar membranes under forward and reverse bias conditions. Theory vs. experiment (Ramírez et al.) 101
FTIR
Kinetic aspects of oxidation of isopropanol on Pt electrodes investigated by in situ time-resolved FTIR spectroscopy (Sun, Lin) 401

GaAs
The potential distribution across the semiconductor|electrolyte interface: a study by electrolyte electroreflectance spectroscopy of GaAs and $Ga_{1-x}Al_xAs$ under conditions of photodissolution (Hutton et al.) 193
$Ga_{1-x}Al_xAs$
The potential distribution across the semiconductor|electrolyte interface: a study by electrolyte electroreflectance spectroscopy of GaAs and $Ga_{1-x}Al_xAs$ under conditions of photodissolution (Hutton et al.) 193
Galvanostatic potential oscillations
Galvanostatic potential oscillations during the electrodeposition of rhenium (Bakos, Horányi) 387
Gold
Dipole effect of (100) monatomic steps of gold $n(111)\times(100)$ vicinal faces in contact with aqueous solutions and under ultra-high vacuum (Lecoeur et al.) 117
Self-assembled monolayers of 3-(ω-mercaptoalkyl)pyrroles on gold (Collard, Sayre) 367
Gold electrode
A combined voltammetry and electrochemical quartz crystal microgravimetry study of the reduction of aqueous Se(IV) at gold (Wei et al.) 109
Growth kinetics
Influence of the forming electrolyte on the electrical properties of anodic zirconium oxide films. Part II. Ac impedance investigation (Patrito, Macagno) 203

H/D substitution
H/D substitution effect on formaldehyde oxidation rate at a copper anode in alkaline medium studied by differential electrochemical mass spectrometry (Jusys) 257

Indole-5-carboxylic acid
Determination of the structure of electropolymerized indole-5-carboxylic acid (Mackintosh et al.) 163
Induced reactant adsorption
Reverse pulse polarography of labile metal + macromolecule systems with induced reactant adsorption: theoretical analysis and determination of complexation and adsorption parameters (Galceran et al.) 307
Infrared spectroscopy
The adsorption of sulfate on gold(111) in acidic aqueous media: adlayer structural inferences from infrared spectroscopy and scanning tunneling microscopy (Edens et al.) 357
Irreversible surface reactions
Theory of EC_1, EC_2, EC_1E, EEC_1 and irreversible surface reactions in polarography (Laviron, Meunier-Prest) 79
IR spectroscopy
Redox characteristics of some substituted formazans in aqueous media (Abou-Elenien) 301
Isopropanol
Kinetic aspects of oxidation of isopropanol on Pt electrodes investigated by in situ time-resolved FTIR spectroscopy (Sun, Lin) 401

Kinetic study
Kinetic aspects of oxidation of isopropanol on Pt electrodes investigated by in situ time-resolved FTIR spectroscopy (Sun, Lin) 401

Labile metal + macromolecule systems
Reverse pulse polarography of labile metal + macromolecule systems with induced reactant adsorption: theoretical analysis and determination of complexation and adsorption parameters (Galceran et al.) 307
Laser trapping
Micrometer size dependence of mass transfer rate across a single droplet|water interface by a laser trapping–electrochemistry technique (Nakatani et al.) 383
Latex particle dispersions
Consistency of voltammetric metal speciation in latex particle dispersions (Día-Cruz et al.) 127

Mass transfer rate
Micrometer size dependence of mass transfer rate across a single droplet|water interface by a laser trapping–electrochemistry technique (Nakatani et al.) 383
Mathematical models
A new approach to measurement modelling in electrochemical impedance spectroscopy (Zoltowski) 45
Measurement modelling
A new approach to measurement modelling in electrochemical impedance spectroscopy (Zoltowski) 45

Mercury electrode
Ac polarography and ac voltammetry of cystine (Vavřička, Heyrovský) 371
Adsorption of methanol, 1-propanol and 1-octanol on a mercury electrode and adsorption of 1-octanol on the adsorbed layer of methanol at a mercury electrode (Sawamoto) 391
Metal/solution interfaces
Dipole effect of (100) monatomic steps of gold $n(111)\times(100)$ vicinal faces in contact with aqueous solutions and under ultra-high vacuum (Lecoeur et al.) 117
Metal speciation
Consistency of voltammetric metal speciation in latex particle dispersions (Día-Cruz et al.) 127
Methanol
Adsorption of methanol, 1-propanol and 1-octanol on a mercury electrode and adsorption of 1-octanol on the adsorbed layer of methanol at a mercury electrode (Sawamoto) 391
Microelectrode study
A further microelectrode study of the influence of electrolyte concentration on the kinetics of redox couples (Beriet, Pletcher) 213
Modified electrodes
A chemical redox reaction following the reduction of a modified electrode (Kanda et al.) 243
Monatomic steps
Dipole effect of (100) monatomic steps of gold $n(111)\times(100)$ vicinal faces in contact with aqueous solutions and under ultra-high vacuum (Lecoeur et al.) 117
Monomeric neutral organic molecules
Simple models for adsorption on electrodes. I. Adsorption of monomeric neutral organic molecules (Nikitas) 319

NMR spectroscopy
Redox characteristics of some substituted formazans in aqueous media (Abou-Elenien) 301
Non-adiabatic electron transfer
Reorganization of the medium and local vibrations in electrode reactions of electron–proton transfer (Benderskii, Grebenshchikov) 29
Nucleation and growth processes
Nucleation and growth on finite electrode geometries — a generalized approach based on Robbins' theorem (Saravanan et al.) 59

1-Octanol
Adsorption of methanol, 1-propanol and 1-octanol on a mercury electrode and adsorption of 1-octanol on the adsorbed layer of methanol at a mercury electrode (Sawamoto) 391
Oil|water interface
Micrometer size dependence of mass transfer rate across a single droplet|water interface by a laser trapping–electrochemistry technique (Nakatani et al.) 383
Organic synthesis
A novel enzyme electrode for the water-free organic phase (Dong, Guo) 405
Oxidation
Kinetic aspects of oxidation of isopropanol on Pt electrodes investigated by in situ time-resolved FTIR spectroscopy (Sun, Lin) 401
Oxidation pathways
Effect of pH on the oxidation pathway of dopamine and dopa (Li, Christensen) 219
Oxide films
Changes in the kinetics of the oxygen evolution reaction induced by oxide films at platinum electrodes (Bolzán, Arvia) 157
Influence of the forming electrolyte on the electrical properties of anodic zirconium oxide films. Part II. Ac impedance investigation (Patrito, Macagno) 203
Oxygen evolution
Changes in the kinetics of the oxygen evolution reaction induced by oxide films at platinum electrodes (Bolzán, Arvia) 157

Phase transitions
Simple models for adsorption on electrodes. II. Aggregation processes and phase transitions (Nikitas, Andoniou) 339
Phosphate ion adsorption
A voltammetric study of a surface phase transformation of adsorbed HPO_4^{2-} anion on Au(111) in the presence of Na^+ cations (Silva et al.) 395
Photocurrent spectroscopy
A study of copper electrode behavior in alkaline solutions containing benzotriazole-type inhibitors by the photocurrent response method and intensity modulated photocurrent spectroscopy (Modestov et al.) 293
Photodissolution
The potential distribution across the semiconductor|electrolyte interface: a study by electrolyte electroreflectance spectroscopy of GaAs and $Ga_{1-x}Al_xAs$ under conditions of photodissolution (Hutton et al.) 193
Platinum electrodes
Changes in the kinetics of the oxygen evolution reaction induced by oxide films at platinum electrodes (Bolzán, Arvia) 157
Polarography
Theory of EC_1, EC_2, EC_1E, EEC_1 and irreversible surface reactions in polarography (Laviron, Meunier-Prest) 79
Polymer electrolyte fuel cells
An effect of proton conductivity in electrolyte membranes on cathode performances at polymer electrolyte fuel cells (Watanabe et al.) 415
Poly(pyrrole-viologen)
Electrochemically controlled release of chemicals from redox-active polymer films (Cosnier et al.) 233
Potential distribution
The potential distribution across the semiconductor|electrolyte interface: a study by electrolyte electroreflectance spectroscopy of GaAs and $Ga_{1-x}Al_xAs$ under conditions of photodissolution (Hutton et al.) 193
1-Propanol
Adsorption of methanol, 1-propanol and 1-octanol on a mercury electrode and adsorption of 1-octanol on the adsorbed layer of methanol at a mercury electrode (Sawamoto) 391
Proton conductivity
An effect of proton conductivity in electrolyte membranes on cathode performances at polymer electrolyte fuel cells (Watanabe et al.) 415
3-(ω-mercaptoalkyl)pyrroles
Self-assembled monolayers of 3-(ω-mercaptoalkyl)pyrroles on gold (Collard, Sayre) 367

Quartz crystal
Simultaneous detection of structural change and mass transport accompanying the redox of a ferrocenylundecanethiol monolayer with the novel FT-IR reflection absorption spectroscopy/electrochemical quartz crystal microbalance combined system (Shimazu et al.) 409

Reaction kinetics
Changes in the kinetics of the oxygen evolution reaction induced by oxide films at platinum electrodes (Bolzán, Arvia) 157
Redox-active polymer films
Electrochemically controlled release of chemicals from redox-active polymer films (Cosnier et al.) 233
Redox characteristics
Redox characteristics of some substituted formazans in aqueous media (Abou-Elenien) 301
Redox couples
A further microelectrode study of the influence of electrolyte concentration on the kinetics of redox couples (Beriet, Pletcher) 213
Redox profiles
A voltammetric study of a surface phase transformation of adsorbed HPO_4^{2-} anion on Au(111) in the presence of Na^+ cations (Silva et al.) 395
Redox reactions
A chemical redox reaction following the reduction of a modified electrode (Kanda et al.) 243
Redox recycling
Highly sensitive and selective determination of riboflavin by flow injection analysis using parallel dual-cylinder microelectrodes (Peng et al.) 185
Reverse bias
Bipolar membranes under forward and reverse bias conditions. Theory vs. experiment (Ramírez et al.) 101
Reverse pulse polarography
Reverse pulse polarography of labile metal + macromolecule systems with induced reactant adsorption: theoretical analysis and determination of complexation and adsorption parameters (Galceran et al.) 307
Rhenium
Galvanostatic potential oscillations during the electrodeposition of rhenium (Bakos, Horányi) 387
Riboflavin
Highly sensitive and selective determination of riboflavin by flow injection analysis using parallel dual-cylinder microelectrodes (Peng et al.) 185
Robbins' theorem
Nucleation and growth on finite electrode geometries — a generalized approach based on Robbins' theorem (Saravanan et al.) 59

Scanning tunnelling microscopy
The adsorption of sulfate on gold(111) in acidic aqueous media: adlayer structural inferences from infrared spectroscopy and scanning tunneling microscopy (Edens et al.) 357
Selenium (IV)
A combined voltammetry and electrochemical quartz crystal microgravimetry study of the reduction of aqueous Se(IV) at gold (Wei et al.) 109
Self-assembled monolayers
Self-assembled monolayers of 3-(ω-mercaptoalkyl)pyrroles on gold (Collard, Sayre) 367
Semiconductor Electrodes
Electrochemical reduction of carbon dioxide at elevated pressure on semiconductor electrodes in aqueous solution (Halmann, Aurian-Blajeni) 379
Semiconductor|electrolyte interface
The potential distribution across the semiconductor|electrolyte interface: a study by electrolyte electroreflectance spectroscopy of GaAs and $Ga_{1-x}Al_xAs$ under conditions of photodissolution (Hutton et al.) 193
Size dependence
Micrometer size dependence of mass transfer rate across a single droplet|water interface by a laser trapping–electrochemistry technique (Nakatani et al.) 383
Stability constant
Reverse pulse polarography of labile metal + macromolecule systems with induced reactant adsorption: theoretical analysis and determination of complexation and adsorption parameters (Galceran et al.) 307
Structural characterization
Determination of the structure of electropolymerized indole-5-carboxylic acid (Mackintosh et al.) 163
Substituted formazans
Redox characteristics of some substituted formazans in aqueous media (Abou-Elenien) 301
Sulphate
The adsorption of sulfate on gold(111) in acidic aqueous media: adlayer structural inferences from infrared spectroscopy and scanning tunneling microscopy (Edens et al.) 357

6-Tolyltriazole
A study of copper electrode behavior in alkaline solutions containing benzotriazole-type inhibitors by the photocurrent response method and intensity modulated photocurrent spectroscopy (Modestov et al.) 293

Underpotential deposition–anodic stripping
Dynamics of surface alloying promoted by cadmium underpotential deposition–anodic stripping cycles on irregular silver electrodeposits (Martins et al.) 141
UV spectroscopy
Redox characteristics of some substituted formazans in aqueous media (Abou-Elenien) 301
UV-vis. spectroscopy
Simultaneous detection of structural change and mass transport accompanying the redox of a ferrocenylundecanethiol monolayer with the novel FT-IR reflection absorption spectroscopy/electrochemical quartz crystal microbalance combined system (Shimazu et al.) 409

Voltammetry
A combined voltammetry and electrochemical quartz crystal microgravimetry study of the reduction of aqueous Se(IV) at gold (Wei et al.) 109
Consistency of voltammetric metal speciation in latex particle dispersions (Día-Cruz et al.) 127
Redox characteristics of some substituted formazans in aqueous media (Abou-Elenien) 301

Zirconium
Influence of the forming electrolyte on the electrical properties of anodic zirconium oxide films. Part II. Ac impedance investigation (Patrito, Macagno) 203
